SUMMARY

Full-Stack Developer building React, TypeScript, Node.js and PostgreSQL applications since 2023, with 1+ year in professional teams. Currently shipping UnTangler, a production voice-first PWA for students with ADHD. Previously built React interfaces for two enterprise clients and event-driven and RAG systems at TEJ Center. Open to full-time roles and freelance projects.

EXPERIENCE

Full-Stack Developer | Compass Decisions Science LLC

Jul 2026 - Present

- Build UnTangler, a production voice-first PWA for students with ADHD (React 19, TypeScript, Express, Supabase/PostgreSQL) in a two-developer team with a product owner; completed 88 of 89 assigned Jira tickets and authored 160 of 286 non-merge commits (17 Jul - 17 Sep 2026).
- Integrated Gemini Live for voice task creation; backend-issued single-use tokens let the browser connect directly, so the API runs as one Vercel serverless function with no WebSocket proxy.
- Built timezone-aware date handling for spoken times such as “tomorrow at 5” and Google Calendar, Tasks and Classroom sync with completion write-back.
- Designed the end-of-day check-in flow (Web Push, in-app notifications, scheduled dispatch job); fixed the app to WCAG AA after an accessibility audit; set up CI with GitHub Actions.

Junior Software Developer | TEJ Center Private Limited

Jan 2026 - Jul 2026

- Built responsive, cross-browser React.js interfaces for 2 enterprise client applications.
- Converted Figma mockups into modular Tailwind CSS components; strict peer review contributed to a 40% reduction in UI rendering bugs.
- Delivered every cross-functional milestone on time with UI/UX designers and backend engineers in Agile sprints, using disciplined Git/GitHub workflows.

Software Developer Fellow | TEJ Center Private Limited

Jul 2025 - Dec 2025

- Built team projects in full-stack development, distributed systems and code review (see Projects).

Web Design Intern | Nobel PBC Learning

May 2025 - Jul 2025

- Designed responsive UIs in Figma and semantic HTML/CSS; ran user-flow research and accessibility audits to improve landing page layout hierarchy.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, SQL, HTML5, CSS3

Frontend: React.js, Next.js, Tailwind CSS, Bootstrap, Responsive Design, Accessibility (WCAG AA), PWA

Backend: Node.js, Express.js, Django, RESTful APIs, Microservices, Event-Driven Architecture, WebSockets

Databases: PostgreSQL, Supabase, MongoDB, Redis, Pinecone (Vector DB)

AI/ML: Gemini API, Gemini Live, RAG, YOLO, TrOCR, OpenCV

Tools: Git, GitHub, GitHub Actions, Docker, Apache Kafka, Vercel, Vitest, Jira, Figma, Agile

PROJECTS

E-commerce Order Management System (TEJ Fellowship project): Engineered end to end with Node.js, Kafka order workflows, a PostgreSQL primary/replica split, Redis caching and Docker.

Shopify Merchant Support Agent (TEJ Fellowship team project): Built the Tailwind CSS merchant dashboard for a RAG agent (Gemini, Pinecone) and optimised async requests to help keep responses under 4 seconds.

Citizenship Verification System (University capstone, team project): Developed the Django web app and integrated YOLO and TrOCR for real-time validation of Nepali citizenship documents.

EDUCATION AND CERTIFICATIONS

Bachelor of Computer Engineering | Institute of Engineering (IOE), Dharan Campus

2021 - 2025

Full Stack Open, University of Helsinki (7 ECTS, Grade 5), 2025 | Claude Code in Action, Anthropic Academy, 2026
