SUMMARY

Full-Stack Developer (React, TypeScript, Node.js, PostgreSQL) with 1+ year in professional teams, building for the web since 2023. Currently shipping UnTangler, a production voice-first PWA for students with ADHD. Previously built React interfaces for 2 enterprise clients and event-driven and RAG systems at TEJ Center. Open to full-time roles and freelance projects.

EXPERIENCE

Full-Stack Developer | Compass Decisions Science LLC Jul 2026 – Present

- Build UnTangler, a voice-first PWA for students with ADHD (React, TypeScript, Express, Supabase) in a two-developer team with a product owner; closed 88 of 89 assigned Jira tickets and wrote 160 of 286 non-merge commits (Jul – Sep 2026).
- Integrated Gemini Live for voice task creation; backend-issued single-use tokens let the browser connect directly, so the API runs as one Vercel serverless function with no WebSocket proxy.
- Built Google Calendar, Tasks and Classroom sync with completion write-back, and timezone-aware handling of spoken times such as “tomorrow at 5”.
- Designed the end-of-day check-in flow (Web Push, in-app notifications, scheduled dispatch job); ran an app-wide accessibility audit and fixed its findings to WCAG AA; set up CI with GitHub Actions.

Junior Software Developer | TEJ Center Private Limited Jan 2026 – Jul 2026

- Built responsive, cross-browser React interfaces for 2 enterprise client applications.
- Converted Figma mockups into modular Tailwind CSS components; strict peer review helped reduce UI rendering bugs.
- Worked in Agile sprints with UI/UX designers and backend engineers, using disciplined Git/GitHub workflows.

Software Developer Fellow | TEJ Center Private Limited Jul 2025 – Dec 2025

- Built full-stack team projects (see Projects) in a program covering distributed systems, AI and peer code review.

Web Design Intern | Nobel PBC Learning May 2025 – Jul 2025

- Designed responsive UIs in Figma and semantic HTML/CSS; ran user-flow research and accessibility audits on landing pages.

Front-End Developer (Remote) | Freelance 2023 – 2025

- Built interactive dashboards in vanilla JavaScript for training platforms.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, SQL, HTML5, CSS3

Frontend: React.js, Next.js, Tailwind CSS, Bootstrap, Responsive Design, Accessibility (WCAG AA), PWA

Backend: Node.js, Express.js, Django, RESTful APIs, Microservices, Event-Driven Architecture, WebSockets

Databases: PostgreSQL, Supabase, MongoDB, Redis, Pinecone (Vector DB)

AI/ML: Gemini API, Gemini Live, RAG, MCP, YOLO, TrOCR, OpenCV

Tools & Practices: Git, GitHub, GitHub Actions, Docker, Apache Kafka, Vercel, Vitest, k6, Jira, Figma, Agile

PROJECTS

E-commerce Order Management System (TEJ Fellowship team project, GitHub): Designed the system and wrote most of it: an Express API with a PostgreSQL primary and two read replicas, Redis caching, a Kafka payment worker and k6 load tests.

Shopify Merchant Support Agent (TEJ Fellowship team project, GitHub): Built most of the RAG pipeline (chunking, Pinecone embeddings, hybrid search, MCP tools, caching) and the dashboard; latency analysis put answers at about 3.5 s.

Citizenship Verification System (University capstone, team project, GitHub): Developed the Django web app and integrated YOLO and TrOCR for real-time validation of Nepali citizenship documents.

EDUCATION AND CERTIFICATIONS

Bachelor of Computer Engineering | Institute of Engineering (IOE), Dharan Campus 2021 – 2025

Full Stack Open | University of Helsinki (7 ECTS, Grade 5) 2025

Claude Code in Action | Anthropic Academy (issued as Ganesh Tharu) 2026
